Box 1445 • Riverton, WY 82501

Greetings Cattlemen,

Welcome to the 21st annual "Cowboy Bulls" production sale. We are experiencing exciting times at Lucky 7 Angus. Our genetic feed efficiency is real and being proven over and over again. Interest in our program is at the highest level we have ever seen.

Our goal to have "the Most Profitable Customers in the Livestock Industry" led us to implement state of the art management and technology. Going in a direction no other seedstock producer has gone, has sometimes made us question whether we were going to greener pastures or running off a cliff. Would we make better or worse genetics for our customers?

Our results show greener pastures, with feedlot data that is easily at the very top of the industry. Lucky 7 Angus genetics that convert 3.86 to 1 for 70 days at a grow yard, then to go on to a 35,000 head fat lot and become the number 1 and 2 most efficient pens. (Tiffany Cattle Co.) They averaged over 99 percent choice and better, with instances of 55% prime. Matt Varra - Kimball, NE feeds his (Lucky 7 genetics) heifers which gained 4.8#/day and went 100% choice and better after only 131 days on feed. Not only are we making cattle that raise more pounds of beef per acre on your ranch, but they are second to none in the feedlot.

Lucky 7 easily has the most accurate PAP test in the Angus breed. Our high elevation customers know our program has the highest standards, testing at 7589' after 93 days exposure, which Dr. Tim Holt, DVM said, "is complete insanity". Our cows are above 7000' over 8 months every year-No other major seedstock producer does that. Lucky 7 Angus is a true high elevation program and we don't just PAP test to sell bulls. We live it.

We are receiving numerous phone calls from ranchers that are excited about our Nation's Only 4 Year Guarantee. Their response is usually, "You can't offer a 4 year guarantee if you have feet and leg problems." True indeed! Our bulls are developed in large gravel pastures and not fed nearly as hard as our competitors' bulls. This creates strong feet and leg growth plus we have paid great attention to these traits as some of our pastures are 38,000 acres and above. Just the other day one of the guys that help us with our sale said, "These bulls have the best feet of any I have seen." (I won't mention his name as he helps with numerous bull sales, including every big name.)

All bulls in this sale have scientifically proven feed efficient genetics, in most cases 3, 4 and 5 generations deep. The only PAP tested bulls to sell in the USA that are scientifically proven feed efficient. This year's bulls are second to none for phenotype and quality. There are bulls clear at the end of the sale that could make any commercial or registered outfit better. Just to name a few are lots 348, 349 and 350.

You see the difference in our program versus our competitors, is that we put your profits first. We have never spent one penny on foot or hair trimming, outside promoters, show cattle or extra feed/corn-things that only make the seller money. We invest in profitable traits for you. We know there are many choices for you as to where you buy bulls. We respect that and are extremely blessed when you choose our program. Our warmest welcome goes out to you and your families. If we can be of assistance, don't hesitate to ask.

Thanks and may God bless you, Lucky 7 Angus

# LUCKY 7 ANGUS

***Where tougher conditions, and higher testing standards make better bulls!!!***

21st Annual "Cowboy Bulls" Production Sale  
**Saturday, March 7, 2020**

Riverton Livestock Auction • Riverton, Wyoming  
 12:00noon • Lunch Provided by Riverton Cow-Belles

**AUCTIONEER**

Warren Thompson..... 307-851-2990

**SPECIAL REPRESENTATIVES**

Barry Ellis ..... 406-855-4183  
 Curt Cox, WY Livestock Roundup ..... 307-630-4604  
 Devin Murnin, Western Livestock Journal ..... 406-696-1502  
 Kurt Kangas, American Angus Assoc. .... 406-366-4190  
 Matt Wznick, Tri-State Livestock News ..... 406-489-2414  
 Blake Tucker, Superior Livestock ..... 308-660-3963

**SIGHT UNSEEN PURCHASE GUARANTEE**

Buyers unable to attend the sale may call or send their bids to any of the special representatives listed. All cattle come with a Satisfaction Guarantee.

**ACCOMMODATIONS**

Sundowner Motel, 307-856-6503 or 1-800-874-1116  
 616 North Federal Blvd., Riverton, WY  
 Sale Headquarters. Ask for Lucky 7 Angus rates!!

**PAP TESTING**

All PAP scores on 2 yr old and fall bulls were taken at 7,580ft and yearlings at 7,075ft elevation after over 90 days exposure by Dr. Tim Holt. For further PAP information see page 4.

**FEED EFFICIENCY**

Many of the bulls in the sale went through the GrowSafe test system. Of the bulls tested, the top 50% will be shown under their footnotes. A feed efficiency evaluation score will be added in the footnotes as an additional reference for your convenience. See page 14 for details.

**LUCKY 7 FOUR YEAR BULL GUARANTEE**

See our bull guarantee program on Page 19.

**TERMS & CONDITIONS**

CASH. Cattle sell under the Terms and Conditions of the American Angus Association.

**SALE ORDER**

Bulls sell in Catalog Order; yearlings, fall bulls, 2 yr old bulls

**SALE DAY PHONES**

307-850-2514 or 307-850-2053 and 307-856-2209 RLA

**SALE LOCATION**

Riverton Livestock Auction, 1490 South 8th Street East

**INSPECTION**

Cattle are available any time at the ranch and will be at the Riverton Livestock Auction March 6, 2020.

**DELIVERY**

Free delivery first 300 miles on purchases of \$3000 or more. All other delivery at cost.

**FERTILITY**

All bulls will be fertility tested within 3 weeks prior to sale. This will guarantee all bulls selling to be fertile and satisfactory breeders at time of sale. (Some breeders do not have bulls fertility tested before the sale, but it is mandatory at Lucky 7 Angus to meet our high standards.

**ULTRASOUND AND CARCASS DATA**

Ultrasound carcass and fertility test information will be available at the sale.

**BULLS SELL IN WORKING CLOTHES**

The bulls in this sale have been on a high roughage low energy ration. They will not be as fat as at most sales. Overfeeding bulls causes permanent fertility problems. Bulls fed as these are, will simply breed more cows.

*Announcements from the block take precedence over any printed matter.*

It will be hard to find a bull that combines his moderate frame with such performance. 736 has it all. Calving ease, performance, phenotype, feed efficiency, Carcass, Low PAP and scored a #1 for Tenderness.(Extremely Tender) Top 25% RFI in pen @ -1.20. Ratio 137 on IMF and 107 Ribeye. His calves are thick and good.

2 Year olds and Fall bulls were PAP tested at 7,580 feet, and Yearlings at 7075 feet after 93 days exposure.

## “PAP RISK CATEGORY EVALUATION”

This information was performed in a consultation with Dr. Tim Holt, DVM, after PAP testing and all variables were known.

### 5 Star ♥♥♥♥♥ Low Risk Cattle:

These are cattle that have been PAP measured and have found to be at LOW risk for developing or carrying the gene combination for true Bovine High Mountain Disease. This group of cattle is suitable for use at any elevation.

### 4 Star ♥♥♥♥ Moderate Risk Cattle:

These are cattle that have been PAP measured and have found to be at a MODERATE risk for developing or carrying the gene combination for true Bovine High Mountain Disease. This group of cattle is suitable for use at the elevation of testing and below. (PAP test was performed at 7,580 feet on all Two year olds & Fall bulls. The Yearlings were PAP tested at 7,075 feet. )

### 3 Star ♥♥♥ Unknown Risk Cattle:

These are cattle that a PAP test was unable to be performed, or cattle PAP tested at less than one year of age with a PAP score of 46-49mmhg. This group of cattle can change, as per risk category, up or down and therefore it is advised that they be retested when they are acclimated to their new home.

### Not Recommended at Elevations Above 6,000 feet

*Dr. Holt PAP testing above 7,000 feet*

### DEFINING A RISK CATEGORY:

The PAP Risk Category Evaluation is being developed to add to the repeatability and dependability of a PAP measurement. The PAP score measurement in and by itself is a meaningless number without knowing the age, size, elevation, length of exposure to that elevation, environmental conditions, Systolic and Diastolic pressures. By adding to the PAP score, a risk category, the buyer can make a better selection for use in high elevation. All animals in each risk category have nearly the same statistical chance of developing or carrying the gene combination for true High Mountain Disease. The PAP test is not 100% in any fashion but it is an indicator of pulmonary hypertension in that animal. Each animal tested will be given a risk category rating following the test and evaluation of the variables mentioned above. This information and scoring was 100% done in consultation with Dr. Tim Holt, DVM.

(Lucky 7 Angus will guarantee all bulls selling in this catalog for High Mountain/Brisket Disease up to 6,000 feet elevation and all Low to Moderate Risk bulls up to the corresponding elevation of the PAP Risk Scoring Category Evaluation.)

♥♥♥♥♥♥♥♥♥♥ A PAP test performed at 5,500 feet and below will locate less than 60% of the animals carrying the gene combination for true Bovine High Mountain Disease in elevations above 7,000 feet. This information has been proven at Lucky 7 Angus by testing, research and data.♥♥♥♥♥♥♥♥♥♥

### LUCKY 7 ANGUS IS A TRUE PAP/HIGH ELEVATION PROGRAM!

PAP testing is only one tool to help prevent high elevation or Brisket disease. If it is performed correctly, above 6,400 feet and more than 42 days exposure, it is somewhat effective. It becomes a much better tool if it is performed above 7,200 feet with a minimum of 75 days exposure. For ranchers above 6800 feet no PAP Test will ensure a bull to not escalate the disease. The genetic base or cow herd of the bull must acclimate to high elevations as well. Meaning they must live above 6,800 feet year round, or be above 7,000 feet more than 6 months per year including during key stress periods (through fall and cold parts of winter). This has been proven at Lucky 7 Angus and confirmed by Dr. Tim Holt. All Lucky 7 Angus cows run above 7,000 feet for 8 months and through the coldest part of winter (early May into January). All fall and 2 year old bulls are PAP tested at 7,580 feet after a 93 day exposure.

## Yearling Bulls - Lots 1-60

Every Yearling bull is out of a first calf heifer. This very well could be the most powerful bulls out of first calf heifers to sell anywhere in the world! We believe around half of them to be true Herd Bull prospects that could advance any seedstock program.

This is the first Esquire 7053 calf to sell. His sire has one of the most feed efficient pedigrees in the industry. An Incredible feed conversion of 5.61:1. Grand Dam is a product of our intense embryo program.

Retaining 1/3 Semen Interest. Lucky 7 Angus may collect semen and use this bull. This bull is a 3/4 brother to lot # 13 bull. He went off feed in his feed efficiency test or I'm sure he would have excelled the same. Grand Dam is a product of our intense embryo program.

## FEED EFFICIENCY

About 70% of the bulls went through the “GrowSafe” feed efficiency test system. Of the bulls tested the top 50% will be shown under their footnotes. This data has been calculated into a RFI score. (Residual Feed Intake) The lower the RFI score or more negative, the better the feed efficiency. We also notate animals with exceptional feed conversions, as per ration, another measure of feed efficiency. All bulls in this sale will be at the top of the industry for feed efficiency. Dr. Kerley with the University of Missouri has studied our data and determined Lucky 7 genetics to be 15-30% more efficient than average. In feedlots, with over 3500 animals fed out, Lucky 7 Angus genetics have been in the top 1-15% for feed efficiency in every pen. Lucky 7 cows are maintaining on diets 30-45% less than nutritional guidelines have determined necessary.

68% of the cost of raising a cow is associated with feed. This fact alone is proof that feed efficiency in cattle has the greatest economic impact on any ranch. Interesting data on dairy cows has shown, if a cow is proven to be (10%) more feed efficient, she will produce (10%) more milk on the same ration as an average feed efficient dairy cow and when not in production eat (10%) less. This directly correlates with what we see here at Lucky 7 Angus as well.

Feed efficiency testing growing cattle in a feedlot may not locate the cattle efficient on your ranch. Only by testing the cowherd too can you guarantee feed efficiency both at your ranch and in the feedlot. Lucky 7 Angus has also proven feed efficiency in our cowherd by limit feeding them using big vertical mixers for the past 15 years. Every bite they eat is weighed. We know how much they require this year, last year, and 15 years ago. No other seed stock producer has this advantage.

### FEED EFFICIENCY SCORING SYSTEM

Lucky 7 Angus has been feed efficiency testing our cow herd since the early 2000’s. In 2009 we purchased a “GrowSafe” Feed Intake Monitoring System to have infinitely more feed efficiency testing and data. For the past 10 years we have relentlessly researched and studied feed efficient pedigrees. Our knowledge is second to none in this field. Lucky 7 Angus has the highest accuracy or R squared number in the “GrowSafe” data base. Even with the most accurate data, many variables can change the RFI score and give you a false prediction. That is why it is impossible to determine with any RFI numbers the true feed efficient animals. Our customers have asked for an easier and more reliable tool. We have implemented a Feed Efficiency Evaluation Score to predict the probability on every bull selling. This score is calculated by using scientific, statistical and analytical data derived from test results, parentage and other variable factors. For a total of +100 to a -100, with zero being an average animal. (See below) This is the same method Lucky 7 Angus uses to discover true scientific Feed Efficiency in cattle. This scoring system will add to the predictability of an animal passing feed efficient genetics.

<i>Any animal of +50 and above we estimate to be in the top 10 to 20% of the breed.</i>	
<b>+100</b>	<b>Extremely Feed Efficient</b>
<b>+50</b>	<b>Very Efficient (Top 15 – 20% of the breed)</b>
<b>0</b>	<b>Average of Breed</b>
<b>-50</b>	<b>Inefficient</b>
<b>-100</b>	<b>Extremely Inefficient</b>

**You can't talk a trait unless you can prove it!**

**Fall Bulls - Lots 61-90**

All 30 fall-calved bulls were born on our Oklahoma ranch. They were brought to Daniel, WY early June where they ran in high elevation pastures with the rest of our 2 year old bulls. They were PAP tested at 7589 feet. These bulls are out of the top end of the Lucky Angus cows and some are embryos from our elite genetics. Once weaned, they go through the same rigorous testing as the rest of our bulls. The weaning weights are a bit lower as we have been on a southern learning curve and their nutrient requirements were not always met. Their Momma's have been through more difficult conditions than any cows we own. Make no doubt about it, they are some of the best bulls in this sale

**LUCKY 7 ANGUS "NO BULL SHIT" 4 YEAR GUARANTEE**

All bulls selling over \$3000 in the March 7, 2020 sale will be guaranteed against injury that renders them incapable of breeding, or to be a potential breeder except those specifically listed below. How much more could you pay for a bull knowing he would last 4 years? And how much better could you manage your budget and your genetics? Knowing the average longevity of bulls from most breeders, this could easily be worth \$1500/bull or more. As the industry leader, breeding and raising bulls capable of holding up, lasting longer and taking tougher conditions, it is fitting that Lucky 7 Angus is the first to raise the bar and offer a 4 year guarantee. We hope that others who claim to have bulls which can do the same will step up to the plate.

This guarantee only applies to original purchaser and shall not apply to any bull which has not been maintained by original purchaser at all times and for normal breeding practices and in normal breeding conditions. This guarantee only applies to bulls which are maintained at all times in accordance with rules and practices of good animal husbandry and management.

Claims shall be resolved as follows: Bulls purchase price up to \$8500 less salvage value (\$1200.00 minimum) shall be credited to the purchaser toward purchase of (1) bull at following Lucky 7 Angus Bull sale. The credited purchase price decreases by 25% per year, after turn out to cows, or July 1st, whichever is earlier. All Credits due must be used In first proceeding Lucky 7 Angus bull sale following injury, or will become void. Original purchaser must contact Lucky 7 Angus within 14 days of discovery of injury and have licensed veterinarian's verification. Lucky 7 Angus retains the right to use an agent of their choice for all verifications. If any claims are denied by Lucky 7 Angus, purchaser must respond with written legal explanation describing why guarantee should apply, or lose any guarantee available on bulls.

*Exceptions: Injuries or loss caused by motor vehicles, equipment, or trains; injury or loss caused by acts of nature/God including but not limited to: lightning, tornadoes, blizzards, freezing cold, fires, drowning; injury or loss from disease, feed intake or poisoning, any human caused injury or loss, including but not limited to: nuclear, radioactive, contamination, war, invasion, acts of terrorism; confiscation, quarantine, theft; malicious or willful injury to animal, injury or loss caused by carelessness, neglect; failure to maintain good animal husbandry and management; any injury or loss caused by predation.*

IMF Ratio-117. Ribeye Ratio-106. Tender, #2.

**TENDERNESS TESTING**

For the past 3 years we have been tenderness testing bulls using cutting edge technology that is more sophisticated than human medical equipment. It measures the muscle bundles, which is directly associated with tenderness. Just one more tool we believe could make our customers more money in the future, very few seedstock producers can offer this. Only about 80% of the bulls in the sale were evaluated. Any 2 year olds that were located Tender or Extremely Tender will say in the footnotes. Yearling and fall bulls will have data in supplemental sheet prior to the sale.

#4 RFI in pen @ -3.83. This is a herd bull prospect clear at the end of the sale. A testament to the consistency and quality of this offering. Dam is a product of our intense embryo program. There are 4 flush cows in his immediate pedigree. Tender #2

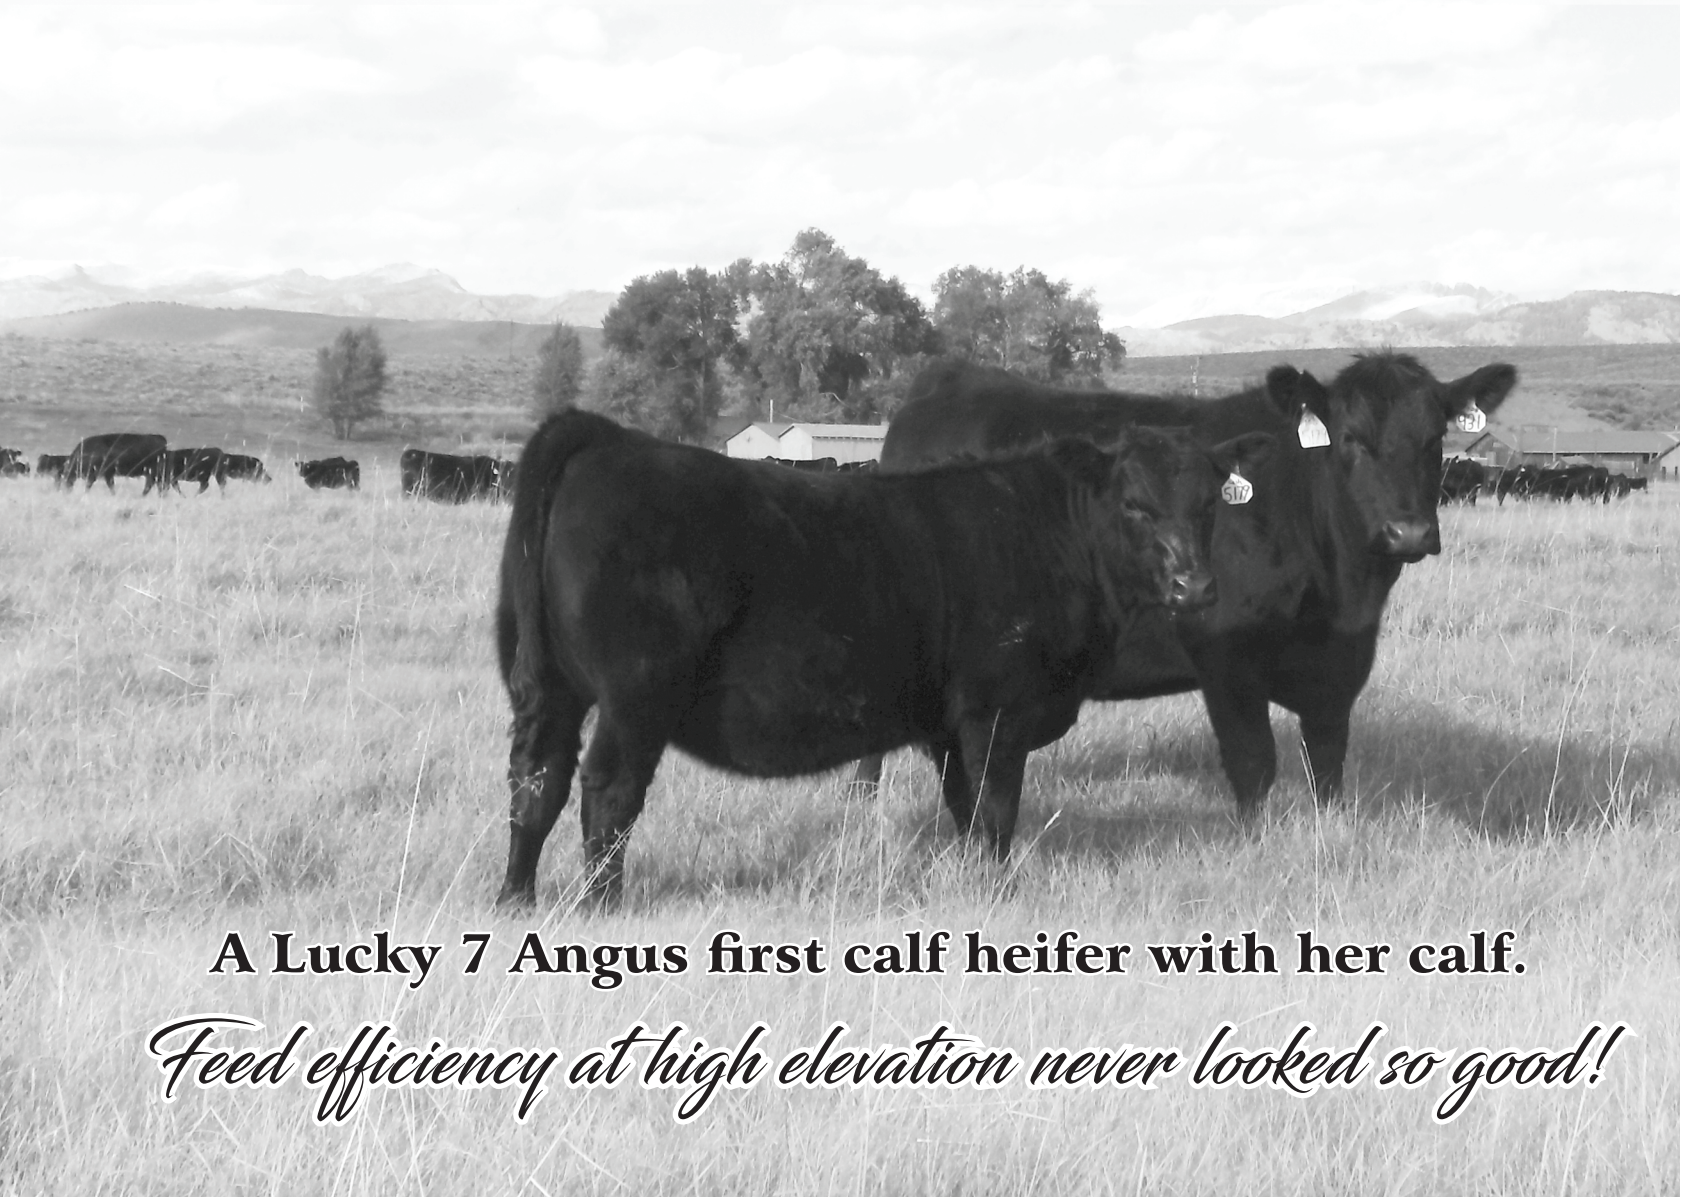

# 'TILL WE MEET AGAIN

*"The Lord himself goes before you and will be with you,  
He will never leave you nor forsake you. Do not be afraid, do not be discouraged."*

*-Isaiah 58-11*

**Art DeGrand 8/18/1955 – 1/2/2020**

*We will miss you. The world is a better place because you were here. It brings me great sadness to announce the passing of a true friend and mentor, Art DeGrand of Baker Montana. Many of you got to know Art at our bull sales. He was always fun, had a great smile and was a joy to be around. I first met Art the fall of 1999, as we partnered up on Alliance Electra 76Ear. Since that time, we partnered on many bulls and took several trips to look at Angus genetics. "Honest Art" as many called him, had unbelievable honesty and integrity, which is not a trait you see in most seedstock producers. Although there will always be a whole in our hearts because he is not with us, I thank God for the time we got to spend with him. Hats off to you Art DeGrand! We will be better people because of you.*

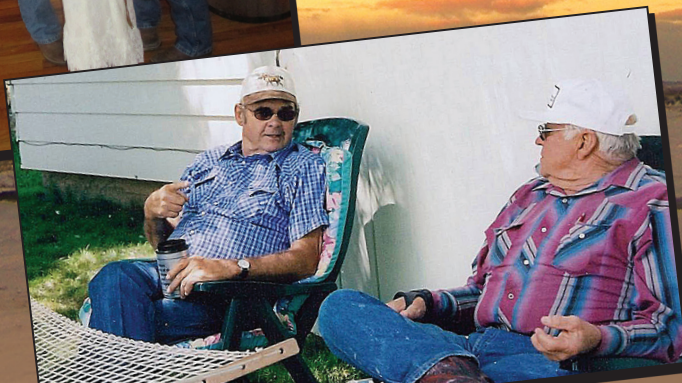

**A Lucky 7 Angus first calf heifer with her calf.**

*Feed efficiency at high elevation never looked so good!*
